Research Experience

Microsoft AI

MEMBER OF TECHNICAL STAFF, AI

- Train large language models.

Mountain View, CA

April 2024 - Present

UW NLP Research Group

RESEACH ASSISTANT (ADVISORS: MARI OSTENDORF & HANNANEH HAJISHIRZI)

- Built a RLHF framework for *LMs to learn from fine-grained human feedback* and showed its effectiveness on two long-form text generation tasks.
- Collected data for *information-seeking conversations with mixed-initiative interactions* and developed strong baselines.
- Built a multi-task model of *knowledge identification in document-grounded conversations* and achieved state-of-the-art results in two recent datasets.
- Proposed a new text-to-data task, *document summarization using structured relational graphs*, together with evaluation metrics for the task. Implemented and assessed strong baselines as well as a new approach based on graph learning.

Seattle, WA

Fall 2018 – Winter 2024

Google Research Language Team

RESEARCH INTERN (MENTORS: GAURAV TOMAR, YI LUAN & HANNAH RASHKIN)

- Worked on *query rewriting for conversational retrieval* that rewrites the dialogue context in an information-seeking dialogue into a standalone question, and retrieves the most relevant passage from the text corpus with a fixed retrieval system.

Seattle, WA

Summer & Fall 2021

Microsoft Research NLP Team

RESEARCH INTERN (MENTORS: MICHEL GALLEY & BILL DOLAN)

- Proposed the task and evaluation metrics of *template generation* from previously written documents as the first step towards building interactive document writing systems, and built strong baselines with weak supervision.
- Built a *controllable and knowledge-grounded dialogue response generation model* and analyzed how adding control and ground- ing leads to better generated responses.

Redmond, WA

Summer 2019 & Summer 2020
