Research Experience

UW NLP Research Group
ADVISORS: MARI OSTENDORF & HANNANEH HAJISHIRZI

Seattle, WA

Fall 2018 – Present

- Built a RLHF framework for **LMs to learn from fine-grained human feedback** and shows its effectiveness on two long-form text generation tasks.
- Proposed and collected data for **information-seeking conversations with mixed-initiative interactions** and develop two baselines.
- Built a multi-task model of **knowledge identification in document-grounded conversations** and achieved state-of-the-art results in two recent datasets.
- Proposed a new text-to-data task, **document summarization using structured relational graphs**, together with evaluation metrics for the task. Implemented and assessed strong baselines as well as a new approach based on graph learning.

Google Research Language Team
MENTORS: GAURAV TOMAR, YI LUAN & HANNAH RASHKIN

Seattle, WA

Summer & Fall 2021

- Worked on **query rewriting for conversational retrieval** that rewrites the dialogue context in an information-seeking dialogue into a standalone question, and retrieves the most relevant passage from the text corpus with a fixed retrieval system.

Microsoft Research NLP Team
MENTORS: MICHEL GALLEY & BILL DOLAN

Redmond, WA

Summer 2019 & Summer 2020

- Proposed the task and evaluation metrics of **template generation** from previously written documents as the first step towards building interactive document writing systems, and built strong baselines with weak supervision.
- Built a **controllable and knowledge-grounded dialogue response generation model** and analyzed how adding control and grounding leads to better generated responses.

UIUC Data Mining Research Group
ADVISOR: JIAWEI HAN

Urbana, IL

Fall 2016 – Spring 2018

- Improved **distantly supervised information extraction** (detection/classification of entities and relation triples in unstructured text corpora), which replaces human annotation with linking to knowledge bases, by developing noise-robust systems that extract entities and relations.
- Designed and built systems that facilitate automatic **faceted taxonomy construction** from any given text corpus in scientific domains, with a small number of user-provided seed examples.

UIUC MRI Lab
ADVISOR: ZHI-PEI LIANG

Urbana, IL

Spring 2012 - Summer 2012

- Applied signal processing techniques to optimize real-time cardiac image reconstruction and de-noise dynamic MRI.

Industry Experience

IXL Learning
SOFTWARE ENGINEER, PRODUCT TEAM

San Mateo, CA

2015 - 2015

- Maintained and developed IXL web education application and data analysis reporting systems.

Goldman Sachs
SOFTWARE ENGINEER, FIXED INCOME PRODUCTS TEAM

New York, NY

Summer 2013 & 2014 - 2015

- Built a market data monitoring system to inform high frequency traders of data trustworthiness.
- Developed the scalable fixed-income trading applications for daily trading, clearing and reporting.

Altera Corporation
SOFTWARE ENGINEER INTERN, FPGA COMPILER TEAM

San Jose, CA

Fall 2012

- Worked on FPGA synthesis optimization and language extraction.
